

Proud sponsor of the

About us.

After pioneering the product solutions - the original **LifeHammer®** and the keychain version, **ResQMe™** - against vehicular entrapment situations, Innovation Distributing is teaming up with the **National Breast Cancer Foundation, Inc. (NBCF)** to also help save lives through early detection and by providing mammograms for those in need.

Did you know that coincidentally every 12 to 13 minutes, when a person dies on the road, one woman dies from breast cancer? The “Original” **LifeHammer®** -made in Holland- and the keychain rescue tool **ResQMe™** - made in USA - provide quick and effective escape from an overturned, submerged, or electric vehicle failure, by cutting through seatbelts and breaking car windows.

LifeHammer® and **ResQMe™** originally “**Gift For Life**” are naturally now becoming “**Gift For Hope**” too.

Those two lifesaving tools are the best solutions to a deadly problem: entrapment – probably the most overlooked automobile safety risk in America today.

With the association of the National Breast Cancer Foundation, Inc. (NBCF) we offer an amazing opportunity for everyone to do the right thing by helping a double cause!

Join us, let's team up and take action!
